[New! Instructables 2016 Keygen Again Zip Full](#)

The screenshot shows the Arduino IDE interface. The title bar reads "Blink | Arduino 1.6.4 ©ESP8266-Projects.com". The menu bar includes "File", "Edit", "Sketch", "Tools", and "Help". The toolbar contains icons for saving, running, and uploading. The main editor area displays the following code:

```
/*
  Blink
  Turns on an LED on for one second, then off for one second, repeatedly.

  Most Arduinos have an on-board LED you can control. On the Uno and
  Leonardo, it is attached to digital pin 13. If you're unsure what
  pin the on-board LED is connected to on your Arduino model, check
  the documentation at http://arduino.cc

  This example code is in the public domain.

  modified 8 May 2014
  by Scott Fitzgerald
  */

// the setup function runs once when you press reset or power the board
void setup() {
  // initialize digital pin 13 as an output.
  pinMode(13, OUTPUT);
}

// the loop function runs over and over again forever
void loop() {
  digitalWrite(13, HIGH); // turn the LED on (HIGH is the voltage level)
  delay(1000);            // wait for a second
  digitalWrite(13, LOW);  // turn the LED off by making the voltage LOW
  delay(1000);            // wait for a second
}
```

The serial monitor at the bottom shows the following output:

```
Done uploading.

Sketch uses 190,588 bytes (36%) of program storage space. Maximum is 524,288 bytes.
Uploading 34512 bytes from C:\Users\TJ\AppData\Local\Temp\build1388745125150880740.tmp/Blink.cpp_00000.bin to flash at
0x00000000
.....

Uploading 156120 bytes from C:\Users\TJ\AppData\Local\Temp\build1388745125150880740.tmp/Blink.cpp_40000.bin to flash at
0x00040000
.....
